

Congressional serial set Volume 3133

By United States. Government Office

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . . . of the table gives the dates of Chronographie comparison of the standard mean-time clock with the sidereal observing clock. In each case four or five transits of clock stars, to determine the correction to the sidereal clock, were secured within a short interval of the time of comparison. The second column gives the correction to the standard mean-time clock at the time of comparison. The third column gives its daily rate between consecutive corrections. The fourth and fifth columns give the mean barometer and temperature of the clock room for the same interval. The sixth column gives the dates on which time signals were transmitted over the telegraph wires. The seventh column gives the assumed correction to the standard mean-time clock at the time the signal was placed upon the telegraph wires, and the eighth column gives the true correction at the same instant. The ninth...
