

Invitro induction of mutation in potato cultivars

Filesize: 8.06 MB

Reviews

The ebook is straightforward in go through preferable to recognize. It typically does not charge too much. Its been designed in an exceptionally straightforward way and it is just following i finished reading this book where basically altered me, affect the way i really believe.

INVITRO INDUCTION OF MUTATION IN POTATO CULTIVARS

To save **Invitro induction of mutation in potato cultivars** eBook, remember to follow the button under and download the document or have accessibility to additional information that are highly relevant to INVITRO INDUCTION OF MUTATION IN POTATO CULTIVARS ebook.

LAP Lambert Academic Publishing Jan 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - The variation in mutant lines of three potato varieties Cardinal, Diamant and Desiree was studied. All the three varieties showed different callus induction response against different tested media with varying concentrations of plant hormones i.e., Cardinal (37.8%), Diamant (32.8%) and Desiree (42.8%) respectively. Similarly the regeneration efficiency of the callus from microtuber, root, leaf, node and internode explants of Cardinal, Dimant and Desiree with respect to different concentrations of chemical mutagens such as Colchicine and Sodium azide (0.1mM, 0.2mM, 0.3mM, 0.4mM and 0.5mM) was determined. Cardinal, Diamant and Desiree gave 35.33, 31.33 and 40.33 percent response respectively. Genomic DNA of the mutant lines of three cultivars with respect to controls were isolated and analyzed for polymorphisms by using RAPD markers. Four 10 bp random fragment primers, S-13, S-18, S-19 and R-17 were studied and all of them gave the amplification of genomic DNA. All these primers with specific banding pattern were unique in their polymorphic behavior. Different banding pattern of total protein contents were observed by PAGE analysis of mutant lines as compared with control plants. 76 pp. Englisch.
