Genetech/Daya Publishing House, 2008. Hardcover. Book Condition: New. Our concern about environmental safety and sustainability of land productivity is increasing among the scientists, environmentalists and higher officials. With the increasing population, it is also becoming clear that food security for the millions will not be possible unless the available resources are efficiently utilized for increasing the productivity. The Strategy adopted during the green revolution can not be valid anymore under the present conditions. A new strategy of living with the nature and nurturing it of sustainable high productivity should be evolved. Though the use of chemical inputs cannot be altogether avoided, but their use in agriculture has to be minimized or rationalized. So organic farming shows us the way to effectively use the available natural resources for the benefit of the mankind. But unfortunately there are a lot of misunderstanding.
