Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Forest Power: Adventures in Ecology and Forest Management is a collection of articles from The Taos News Natural Resources Notebook column 2007 - 2012 arranged by topic with connecting text and comments, designed for use by the general public interested in learning about basic ecology principles applied to forest management. This is a place where things are often not as they seem on the surface. Simple views are so often misleading when we fail to go into depth on the complex dynamics of forest ecosystems. Something that appears to be horrible can actually be beneficial over time and conversely, a situation that appears good may be detrimental. And time is an essential element in the equation. It's implicit in the term dynamics. Change over time is a key. Forest ecosystems are constantly changing. Nothing remains the same in the flow of time. Understanding the multiple and interacting relationships among plants and animals, large and small, is not easy. However forming a viewpoint and actions without undertaking this adventure can lead to unintended consequences resulting from stances assumed with the best of intentions but lacking in an adequate understanding of ecology. Would-be ecology and forestry students and activists will find this book helpful in deciding on further studies and in being better informed participants in society's quest for forest resource sustainability. Readers will go on a learning adventure into the dynamics of forest ecosystems, . Forest power is the strength of resilience, the energy of photosynthesis, the vast renewable energy and wood products potential; it's the great source of a wide range of economic benefits and environmental services; among them, carbon balance, water and biodiversity;...
